Carbon Fiber Construction  
Easy Planing Speed  
Spacious  
Comfortable  
Competitive

Introducing an all new concept in sailing, encompassing the strength and performance of carbon fiber and the race winning design of Andrej Justin, the all new Anteros 36 is a completely versatile yacht that can be cruised comfortably with the family while still allowing the agility and performance you need to enjoy sailing intensely

From the outset, we have had a very clear vision of the Anteros 36. We sought to develop an exclusive yacht with a high level of finishing using modern materials wherever possible to keep weight to a minimum without sacrificing any strength or rigidity. The boat required a layout that would allow short handed cruising or fully crewed racing and had to achieve planing speeds in a moderate breeze while still offering live aboard comfort in a spacious interior.

## Performance and Handling

Andrej Justin, a leading force in the development of the RC44, is a specialist in planing boats. The underwater profile and appendages are built to the latest design techniques to ensure excellent performance and stability with a ballast ratio that will permit stable shorthanded sailing. All sail control lines are led aft to the cockpit and sailing under asymmetrical spinnaker is an easy luxury using the retractable carbon bow sprit. Crack the sheets, bear away and the acceleration may surprise you!

## Modern Construction

The hull and deck are constructed entirely of carbon fiber using a computer controlled resin infusion system by Polyworx®. Internal moulding are infused composite sandwich with gelcoat or veneered surfaces, all carefully engineered to retain long-lasting quality while keeping weight to a minimum.

## Spars, Rigging and Equipment

The clear-coated carbon mast from RIBA Composites is a standard feature together with the PBO standing rigging from Powerlite®. 1600mm carbon steering wheel supported by carbon pedestal. All deck hardware is from Harken and all running rigging is provided by Maffioli Ropes. Deck hatches by Giot and recessed teak decking in cockpit area.

## Interior:

With standing headroom of 1,90m, the main saloon of the Anteros 36 gives an incredible feeling of space and light. The large folding table allows room to comfortably seat six adults for a meal prepared in the well equipped galley.

One large cabin forward and another aft provide wide berths and storage space for an extended stay. To starboard, the navigation area lies forward of the spacious and modern bathroom which contains a storage area for wet weather gear and sails.

The interior is available in a selection of veneer, painted or gelcoat finishes to meet your particular requirements.
